RE: Patent Application for Dornelas ) Date: March 2, 2004  
Inventor(s): Dornelas ) Art Unit: 1635  
Serial No.: 09/578,194 ) Examiner: Jane J. Zara  
Filed: 05/24/00 )  
Title: Modulation of Storage Organs ) Action: RESPONSE after FINAL OFFICE  
ACTION 1.32

TO: Commissioner for Patents  
PO Box 1450  
Alexandria, Virginia, 22313-1450

Please amend the specification and the claims according to the attached amendments.

**Remarks**

The Examiner requested that the "fully incorporated" language be reinserted into the document. The amendment to the specification reinserts this language.

The Examiner has maintained a number of 35 USC § 112 rejections. The applicant has amended the claims to be directed to the antisense construct that employs a sequence that is from the Seq. ID No. 6. This amendment to the scope of the claims should overcome the various §112 rejections and the claims as amended are believed to be allowable as written.

The applicant's attorney kindly requests that the Examiner call to discuss this amendment with the Applicant's attorney if the Examiner does not find the claims allowable.

Respectfully submitted,

Date: March 2, 2004
